

## Ventilation Louvre Screen - Technical Data

### Ventilation Louvre in flange frame

- Blades Size:** Lv 100
- Material:** Ventilation louvre blades are manufactured in mill finish aluminium to AS/NZS 1866.
- Finishes:** Louvres can be provided in mill finish or powder coat finish.
- Blade pitch:** Standard blade pitch is 112mm which provides 55% free air. If no louvre support is required, blade pitch can be varied to suit opening size.
- Bird mesh:** DIY can provide bird/vermin mesh to all framed louvres.
- Mullions:** Where panel width is greater than 1500mm, louvre support angles are required at a maximum of 1200mm centres.

#### Wind

Wind Load KN/m <sup>2</sup>	112mm pitch			Max. Panel Height
	Panel Width (mm)			
1.0	1000	1250	1500	
1.5	3240	3000	2820	
2.0	2840	2635	2435	
2.5	2580	2325	2110	
	2335	2080	1890
